

POTENTIALLY EXPERT-ONLY SECTIONS

As you may well know, every B road (dirt) in Iowa can be a challenge when soaked but these few sections are more rutted up during inclement weather.

328th Ave: Potentially muddy creek crossing and deeply rutted B road. An absolute joy if you're into that sorta thing.

335th St: Potentially muddy creek crossing and rutted B road.

Cedar Creek crossing on Sassafras Blvd: Large creek crossing. Banks get very muddy when creek floods.
